#### PRECISION-TUNED

## DRIVING

#### A PLATFORM FOR SMOOTH UTILITY

Tuned and calibrated on rural roads, thoroughfares, highways and at validation facilities, the Pacifica is equipped to deliver the ride, feel and comfort of a premium vehicle. Precision-tuned handling allows for more aggressive driving characteristics, precise, responsive steering and best-inclass<sup>19</sup> towing capacity. The low-rolling-resistance tires are a key component to outstanding highway fuel efficiency, while stiffer wheel designs help reduce noise, vibration and harshness (NVH) factors.

#### BEST-IN-CLASS<sup>29</sup> TOWING CAPACITY

Whether it's loading up the trailer with home improvement supplies, garage sale furniture or pulling the family camper or boat, you'll easily get it done with a towing capacity of up to 3,600 lb. When you're pulling that much weight, it's nice to know the available Trailer Sway Control (TSC) will help keep you safely on course.

#### STRUCTURAL INTEGRITY

The upper body and frame of the Pacifica structure are designed as a single unit, helping to achieve premium driving agility. This exceptionally solid architecture carries advanced structural applications, optimized proportions and dynamic qualities like the use of high-strength steels. The door design also increases visibility around the front windows and pillars while sound-absorbing barriers throughout the body and engine area reduce overall cabin noise, contributing to less driver distraction.
